Language Resources

Language resources to study dyslexia (DysList) and to make more accessible texts (CASSA).

DysList, a list of dyslexic errors annotated with linguistic, phonetic and visual features

- Spanish: <http://goo.gl/R8i6em>
- German: <http://goo.gl/X16w6S>

CASSA is composed of lists of synonyms ranked by their complexity in Spanish. We used Spanish OpenThesaurus and Google Books Ngram Corpus to create CASSA resource.

- CASSA resource (synonyms within their context disambiguation): <http://goo.gl/Ipdkuh>
- Simple CASSA: <http://goo.gl/HJHEKC>

I created an annotated two corpus with annotated Explicit Subjects, Zero-pronouns and Impersonal Constructions (ESZIC). Both corpora have texts from two genres: legal (laws) and health (psychiatric papers).

- Spanish <http://goo.gl/WsjVZ1>
- Brazilian Portuguese <http://goo.gl/SAUVab>

During my undergraduate I read the whole Spanish Royal Academy Dictionary (while I was doing an anthology for a company I used to work to) and extracted manually all the Spanish Color Names.

Others

I wrote several pieces of creative writing and a theatre play (*Snow white and they will rip your eyes out*) which was performed in Pablo Iglesias Theatre in Madrid (premiere on the 4th of December, 2005). In 2009 I worked as an art model and during college I was a member of the debate society. I also like designing ambigrams -have more than 200 designs-, painting -reproductions of Joan Miró's paintings- and traveling to watch wild animals in their habitats, specially elephants and whales.
